## **Communiqué of the Assembly of Popular and Diverse Women of Ecuador - Casa Feminista de Rosa**

No to the Coup d'Etat!

The women grouped together in the Assembly of Popular and Diverse Women of Ecuador reject all attempts of a coup d'état wherever they come from. After Latin America passed through decades of cruel dictatorships that meant disappearances, torture, and assassinations for entire generations – that left behind peoples silenced and without rights – and that facilitated the advance of neoliberalism throughout the continent, we cannot allow the return of coups and dictatorships. Never again in Honduras, in Latin America! No to the attempts of a coup in Ecuador! No to CIA interference in our countries! We are not going to allow them to carry out coups that run against popular mandates and that install regimes of terror, persecution, and intimidation. The Constitution of Montecristi of 2008 is the expression of many of our struggles, proposals and dreams and we demand that that the constitutional mandate be fulfilled, democracy respected and our rights guaranteed!

We call for political solidarity and coherence among all the people, all social sectors, movements and organizations.
